

Tualatin Valley Water District

Certification of the Non-Use of your Backflow Prevention Device for Lawn Irrigation

Per Oregon Administrative Rule 333-061-0070 and District Rules and Regulations all approved backflow prevention devices must be maintained and tested at least annually to protect the public water system. Failure to comply with this required testing will result in the disconnection of water service.

- There are approved circumstances where the annual testing of your backflow prevention device will not be required for underground lawn irrigation systems. These circumstances include:
 - When the irrigation system is shut off for the entire year
 - When the irrigation system is disconnected permanently
- To apply for this variance, please complete the form below and return it to Tualatin Valley Water District, Attn: Backflow, 1850 SW 170th Ave, Beaverton, Oregon 97006 or fax to 503-591-0986 or E-mail to backflow@tvwd.org.
- Prior to approval, an on-site inspection may be required by Tualatin Valley Water District (TVWD). A TVWD cross connection inspector will contact you to schedule an appointment if necessary.

Upon receiving a completed and signed form, a copy will be put into your account file and your backflow prevention device will be coded "Out of Service". This code will discontinue the notification to have your backflow prevention device tested each year. **Should you wish to reactive your irrigation system, you must notify TVWD, schedule the device to be tested by a certified tester and submit a copy of the approved certified test report form to TVWD prior to using the irrigation system. Thank you for your assistance.**

The lawn irrigation backflow prevention device has been (check one):

- Shut off up to 1 year Disconnected permanently Removed

Customer Information	
Name:	TVWD Account Number:
Mailing Address:	
Home Phone:	Daytime Phone:

Device Information	
This information may be found on your test notification letter
