Topic: _____

Location: _____

Number of Attendees: _____

Age Group: _____

Will we have access to video, audio or computer equipment? No Yes

Type of equipment: _____

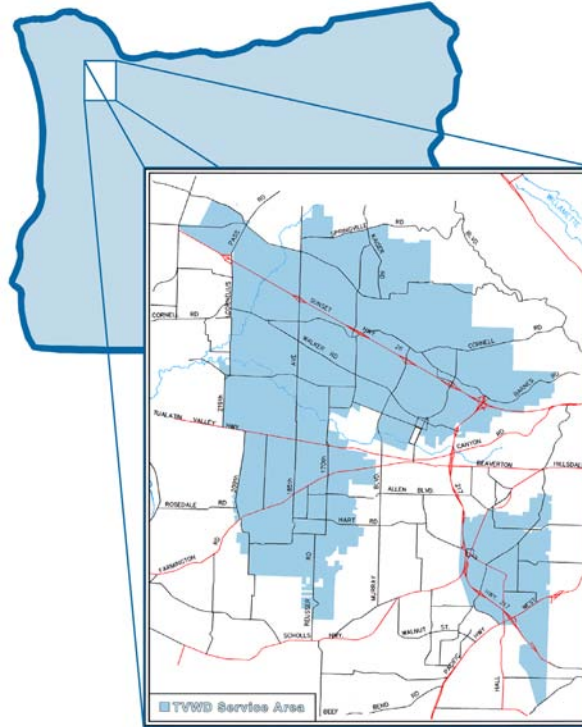

To schedule a speaker,
send this information to:

Phone: (503) 848-3060

Fax: (503) 649-2733

E-mail: outreach@tvwd.org

About Us

Tualatin Valley Water District is Oregon's second largest municipal water provider, serving portions of Portland, Beaverton, Tigard, Hillsboro, and Washington County. We provide quality water and customer service to almost 200,000 customers. Moving more than 23 million gallons of water through our system every day, we play an important role in the economic development of our region. We're proud of what we do!

Business or Organization**

Tualatin Valley Water District Outreach Presentations

Tualatin Valley Water District is a leader throughout the drinking water industry with innovative policies, programs, software and staff. Let us tell you about it!

What Is TVWD Doing?

- 💧 **Capital Improvement Program** —
- 💧 **Protecting the Quality of Your Water** — Learn where your water comes from and how it is monitored and treated.
- 💧 **Planning for Long-Term Water Needs** — TVWD is securing water rights and access to regional water supplies in the face of expected population growth.
- 💧 **TVWD's Search for Sustainability** —TVWD's board and staff are stewards of your environmental, financial, and social resources. Includes a 25 minute video.
- 💧 **Conserving Water in Your Home & Business** — Tips for saving water inside and outside.
- 💧 **Water Rates 101**— How and why TVWD structures its residential and commercial water rates.
- 💧 **Seasonal Topics** — Cold weather tips, planning a water-wise garden, efficient irrigation practices.

For The Kids

Do your students ask "Where does my water come from?", "How does water get to my house?", "How is a leaky pipe fixed?", or "How can I save water?" For answers, we provide **FREE** presentations, talks and displays to fit your water environment curriculum needs.

Professional Performances

- 💧 **Where's Rosie? (Grades 1-2)** - An interactive puppet show. Students learn about watersheds, the water cycle and water conservation.
- 💧 **What Do You Know About H2O? (Grades 3-5)** - Mad Science presents a highly-interactive show focusing on the science of indoor water conservation.

Classroom Presentations (Presented by TVWD Staff)

- 💧 **Source to the Home (All Ages)** - This fun, interactive presentation teaches students about the District water system and how to be a leak detective.
- 💧 **The Incredible Journey (Grades 1-2)** - With the roll of a die, students simulate the movement of water within the water cycle. Students can easily conceptualize the water cycle as more than a predictable two-dimensional path.
- 💧 **Peat Pot Planting Activity (Grades 1-5)** - Students learn the importance of good soil preparation – and why water is important to all living things.
- 💧 **The Incredible Edible Aquifer (Grades 3-5)** - Can pollutants get to the water we drink? As each student makes an edible aquifer, they gain an understanding of how contaminants can reach a water supply.
